

Validated Panels

Meso Scale Discovery® (MSD) V-PLEX Human Biomarker 40-Plex Kit

BioAgilytix applies our deep and unmatched experience validating MSD assay kits to help clients identify relevant biomarkers for their drug development programs. In fact, we have validated over 120 analytes across a range of disease states.

Today we offer five GCP/GCLP validated MSD V-PLEX multiplex panels with assays optimized for efficient biomarker screening and profiling: Proinflammatory Panel 1 (Human), Cytokine Panel 1 (Human), Chemokine Panel 1 (Human), Angiogenesis Panel 1 (Human), and Vascular Injury Panel 2 (Human). These panels are part of the MSD V-PLEX Human Biomarker 40-Plex Kit, and concentrations of all analytes can be measured using a total sample volume of 110 μ L.

***Note:** all panels are validated in serum and plasma.
